---

TECHNICAL PROJECTS
[Professional Portfolio Page](#) | Developed a sleek website highlighting a professional photographer's portfolio.
- Implemented a GitHub repository to meticulously manage branches and project organization, ensuring efficient tracking of project changes throughout the development process.
- Developed a sleek and intuitive website showcasing the photographer/cinematographer's work using JavaScript, TypeScript, HTML, and CSS, ensuring a seamless and visually engaging browsing experience for visitors.

Highlight Skills: Git | TypeScript | HTML | CSS | JavaScript | Debugging

[Nightlight](#) | A fully functional mobile chat application created with JavaScript and React Native.
- Engineered a dynamic JavaScript backend integrated with MongoDB, enabling secure user authentication and account creation functionalities, enhancing the app's functionality and user experience.
- Utilized NGROK to create secure tunnels to local servers, facilitating external access for testing and debugging purposes during the development of web and mobile applications.
- Utilized AWS S3 (Simple Storage Service) to efficiently store, retrieve, and distribute data, ensuring scalability and reliability for web and mobile applications.

Highlight Skills: NGROK | Javascript | React Native | AWS S3 | Postman | MongoDB | CI/CD | Agile | Debugging | Trello

[Jeopardy Board](#) | An interactive Jeopardy game built from scratch for up to two players.
- Utilized Git and GitHub for effective project management, including branch development.
- Custom web-based two-player Jeopardy game featuring two rounds and a final Jeopardy question.
- Employed HTML and CSS for front-end styling, complemented by Postman and JavaScript for back-end functionality.

Highlight Skills: Javascript | CSS | HTML | Git | SDLC | Debugging | Node
